

If you are considering a dedicated home theater reminiscent of the grand movie palaces of yesterday, Our design service and custom installation capabilities can provide you with the ultimate in a custom theater.

We provide a complete system, including audio/video components, seating, lighting, lighting control, motorized curtains and interior design. Our carpenter will fabricate decorative columns, crown moldings and architectural design elements. Custom audio & video is what we provide at Home Entertainment Design (847-729-3700).

We carry theater seating from various manufacturers in styles ranging from the standard movie house seat, to high-end, motorized top-grade leather recliners.

We are trained authorized dealers for all of the brands of audio/video components we install. We provide audio video installations by our in-house staff so the installation is done right.

The aesthetic appeal of our theater interiors is just as important as the quality of the audio and video system they contain. Every detail of the interior is taken into account from the decor and seating, to the light fixtures and the acoustical treatments. Our goal is to provide our clients with a one stop resource for a complete electronic environment for the room that you will enjoy each night. From the decor and furnishings to the electronic components.
